

Attached the data collected for each site Below is a brief summary of the key data.

Please note that the equipment at site 3: The Street by the post office was vandalised part way through the week survey duration. The survey equipment was reinstalled when the other sites were collected . We however only have 6 full days (Saturday to Thursday) of data from across the 3 different weeks. I have removed the incomplete days from the data sheets and recalculated to get 6-day totals and 6-day average Mean and 85th percentile speeds. Please read the NORTHBOUND TOTALS and SOUTHBOUND TOTALS tabs with caution as they are unedited.

The other 3 sites were completed successfully with the survey running for a complete 7 day week 18th to 24th September 2021.

The 85th percentile speed is the speed at which 85% of the traffic is travelling at, or below.

	Traffic Volume (weekly total)	Mean Speed mph (weekly average)	85 th Percentile Speed mph (weekly average)
